' But when I clicked 'More Info,' I was taken to the main Safari site A search for 'QuickTime plug-in' on Apple's website turned up no results.. Safari waits indefinitely for loading the quicktime movie , firefox shows a big 'Q ?'.. Now nearly impossible to be found via Apple's website quicktime 6 for Mac OS 9 is accessible via this versiontracker link.. I tried removing the plugin several times and reinstalling but nothing has worked so far.. It is ironic that apple's own format is not playing on the new iMac The OS is Mac OSX 10.. Don't know what that means This frustrating because I can't view any of the tutorial movies in the apple website. e828bfe731 [Apple Shake Free Download Mac](#)
