The game is pretty fun and it kills time. Just the grenades in this game I have a problem with. Once you release. it falls straight down which sucks because I died instantly lol.. The game would be much more fun if there were enough players on to play against each other otherwise you just play against the bots and that's only fun for a while.. Very interesting.. Nice game I just hope the devs work on it. People say it's a unity asset pack so I'm scared nothing will happen. wish the devs work on it.. doesn't have controls so I can't open doors and the bots already drop and you can't till the last second so you have a huge disadvantage. I honestly think this game has potential and it does not play bad -it has bot support with up to 20 bots and they are quite entertaining -It's very gun/action based there are a lot of items so the matches are action based and relatively quick -vehicles -low system requirements, my laptop with 1.4ghz amd e1 6015, and r2 graphics, 4gb ram approves -it doesn't cost much suggestion: the zone in this game does damage very slowly so it isn't really a threat, it should be doing damage fast, just a bit at least.
