COVER_FINAL.indd 1 24/10/2018 09:06:55 TOP TIPS FOR CHOOSING A DIY UFH
SYSTEM: Consider the weight of the UFH system If you are tackling the installation
yourself don't waste time and cart lugging pallet loads of heavy components into the right
part of the house. Choose a lightweight system and your back will thank you. Choose quality
There's an old adage that says 'if you buy cheap you pay twice'. This doesn't mean that you
need to buy the most expensive UFH system that you can find but choosing a quality product
will save you both time and money in the long run. Opt for a low-profile system that
are renovating a property and fitting UFH over the existing floor choose a system that
minimises any disruption to fit spaces and fittings. Which is the easier install Choosing a completely dry UFH system avoids the need for
screeding contractors and also means there is no waiting around for the floor to dry.
Floor coverings can then be fitted immediately. Choose a system with a pre-attached
for the tube Make life easier for yourself by choosing a UFH system with pre-attached
the tube are already in place. Pre-routed panels and boards make it straightforward to run the
tube around the room and back to the manifold changing direction when needed. They also
hold the tube securely in place. 1 2 3 4 5 If you are renovating a single area of your home you
might be looking to do much of the work yourself. Whilst traditionally this might involve
pausing and decorating there is no reason why you shouldn't consider fitting the underfloor
heating (UFH) yourself too – but it is important to choose the right system. Lightweight low-
profile versatile and completely dry LoPro@Lite is a retrofit UFH system that has been
designed to be easy to install and is compatible with all floor coverings. The latest addition
to Nu-Heat's award-winning LoPro@ range LoPro@Lite is available as both a designed
whole-house system and a high-quality OneZone@ kit for single rooms or areas. LoPro@Lite
consists of pre-rotated high-density EPS (expanded polystyrene) boards which have an
excellent point-load strength and add just 15mm (the height of a 5p coin) to the existing floor
level. Denser plates sit in the straight sections of the boards to enhance heat distribution from
the 10mm FastFlow@ tube providing a cosy even heat. THE LIGHTWEIGHT
HEAVYWEIGHT In an ideal world everything would be stronger than it looks and even
things that seem delicate would be surprisingly heavy-duty. Nu-Heat's new LoPro@Lite
system is the lightweight heavyweight of the underfloor heating world punching above its
weight to deliver the ultimate whole house or single area heating solution. Strong versatile
low-profile and easy to install LoPro@Lite will fend off cold spots and fight your corner
against freezing floors. Visit loprolite.co.uk or call 01404 540701 to discover a better world
of heating. tips for choosing an underfloor heating system 5to install yourself Get in touch –
Call 01404 540701 or email info@nu-heat.co.uk to discuss UFH solutions for your home.
